SUMMARY

Pre-final year Computer Science student at VIT Bhopal focused on building production-oriented systems using Java, Python, and modern web technologies. Experienced in full-stack development, AI/ML integration, backend APIs, and database design. Passionate about applying LLMs, computer vision, and scalable architectures to solve real-world problems.

EDUCATION

VIT Bhopal University

Bachelor of Technology in Computer Science (CSE Core)

Bhopal, India

2023 – 2027

St. Anthony Senior Secondary School

Class XII – Higher Secondary Education

Alok Senior Secondary School

Class X – Secondary Education

PROJECTS

Medicare System | Flask, SQLAlchemy, React.js, LLM Integration

Ongoing

- Building a scalable full-stack healthcare management platform featuring role-based dashboards for patients, doctors, and administrators with secure JWT-based authentication.
- Implemented RESTful APIs for appointment scheduling, vitals tracking, and structured medical history storage using SQLAlchemy ORM with PostgreSQL.
- Integrated multilingual AI health summaries via LLM APIs and automated PDF medical report generation adhering to practical healthcare system architecture.

Bank Management System | Java, Swing, MySQL | [GitHub](#)

- Designed and developed a desktop-based banking application with deposit, withdrawal, PIN change, balance inquiry, and mini-statement modules for end-to-end transaction simulation.
- Integrated MySQL via JDBC with a structured relational schema for secure transaction handling; applied OOP principles and event-driven GUI logic using Java Swing and AWT.

AI Marketing API | FastAPI, HuggingFace, FAISS, Docker

- Developed a JWT-secured multi-agent content generation system leveraging HuggingFace LLMs with FAISS/Chroma vector search for personalized user segmentation and marketing outputs.
- Structured modular FastAPI endpoints following RESTful principles, containerized with Docker for scalable backend deployment on cloud infrastructure.

Blender Addon – Cube Grid & Mesh Operations | Python, bpy

- Developed a custom Blender addon providing a 3D Viewport UI panel for procedural cube grid generation, collection-based object management, selective deletion, and mesh merging.
- Demonstrated proper Blender addon structure, UI–logic separation, and context-aware operator design using the bpy Python API with a clean, user-friendly interface.

Kiddle – Child-Safe Web Browser | Flask, HTML, CSS, JavaScript

- Developed a web-based child-safe browser with filtered search mechanisms, controlled routing, and backend logic restricting unsafe content to promote educational browsing.
- Designed a clean, responsive UI focused on simplicity and accessibility for young users while maintaining robust server-side content filtering.

TECHNICAL SKILLS

Languages: Java, HTML, CSS, JavaScript, Python, SQL

AI/ML/DL: PyTorch, Transformers, CNN Models, Image Classification

Python Libraries/Frameworks: TensorFlow/Keras, OpenCV, Pandas, NumPy, Flask

Web: React.js, Vite, Express, Node.js, Vue.js, Bootstrap, Tailwind CSS

Cloud & DevOps: AWS, Docker, Kubernetes

Databases: MongoDB, PostgreSQL, MySQL

Tools: Git, GitHub, Postman, Render, FastAPI, Java Swing/AWT

LEADERSHIP & EXTRACURRICULARS

NSS VIT Bhopal

(Volunteer – Digital Communication & Social Media)

Contributed to structured social media initiatives and digital outreach campaigns promoting NSS activities across the university community.

May 2024 – Present

NSS RD Bhopal

(Social Media Team Drafter)

Drafted and curated digital content for social media platforms, supporting awareness drives and community engagement initiatives.

Sept 2025 – Present

Vitronix Club

(Social Media Lead)

Led social media strategy and content creation, driving measurable growth in online engagement through coordinated campaigns and consistent brand communication.

Dec 2024 – Present
